

Safety

The low chassis skirt ensures that the wheels remain safely within the truck contours. Together with the rounded, smooth shape of the chassis and tiller head, this reduces all risk of pinching or snagging.

Performance

Powered by an 1.5 kW AC motor, the P50 accelerates fast to reach a 6 m/h full speed. Its 5,000 kg capacity and efficient brakes enable a productive work for heavy duties.

Comfort

The electric steering gives a smooth and efficient control of the tractor. The operator manoeuvres comfortably and his tasks are eased thanks to dedicated compartments to store his working tools. All controls can be operated with either hand without ever having to let go of the tiller.

Reliability

The robustness of the tiller head, the strong hooking system and the high quality pressed steel frame is always something that you can rely on.

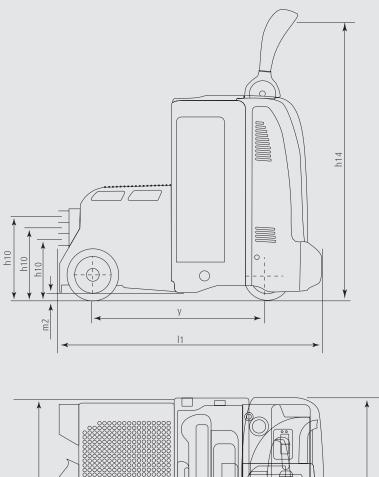

Service

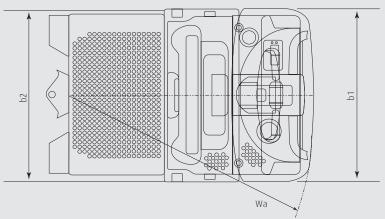

Efficiency at work, efficiency at the cost level. CAN bus connection enables all truck data to be read out for inspection when servicing becomes due at intervals of 1,000 operating hours. Easy accessibility of all components and the maintenance free AC technology employed play an additional part in keeping truck uptime up.

Technical data (According to VDI 2198)

Example of application

The Example shown above illustrates						
A tractor towing	1 t load					
Operating on a ramp of	7 %					
Maximum travelling speed reachable	4 km/h					

Equipment

Standard equipment

Multifunction back lighted display

Key switch or Log in Pin code: ignition

Cushion drive wheel

Dedicated work station (with storage compartments)

Power assisted steering (drive wheel) feedback

Automatic speed reduction when cornering

AC motor

Automatic braking
Electromagnetic emergency brake acting proportionally
to the load weight
Single position hook (300 mm)
Horn
Protection -10°C

Optional equipment

Drive wheel: polyurethane, cushion non-marking or wet grip

Different hooking system

Clipboard

Support for data terminal or barcode reader (centre)

Fixed battery stand for side battery change

Cold store version to –35°C

Other options available on request.

CAN bus architecture

- → Electronic management of all components permitting quick and easy diagnosis
- → All performance parameters can be configured exactly by the service technician for every individual mission

Equipments & Hook system

- → Support for data terminal or barcode reader (centre)
- → Roomy compartment in the back (50 litters)
- → Hook control (inching) on both sides enable a soft and safe hanging
- → Different hooks available: Single position and 3 positions
- → Vertical battery change as standard, optional side battery change left or right
- → Wide range batteries: from 270 Ah (3 PzS) to 500 Ah (4 PzS)
- → Battery locking system for side change option secures battery in compartment and eases the battery change

Brakes

- → Automatic braking on release of the controls
- → Counter-current braking
- → The emergency stop button is electromagnetic on the drive motor and proportional to the load transported

Work station

- → Digital and multifonction display
- → Truck activated by PIN code or by ignition key
- → Wide and deep storage compartments in front and centre for wrapping paper, work gloves, writing utensils, etc.
- → Adjustable backrest in height to provide comfortable and secure driving position

AC motor

- → Powerful and smooth 1.5 kW at 100 % performance
- → Moisture and dust-proof motor, maintenance-free
- → No rollback on uphill starting
- → Maximum speed of 6 km/h, whenever the truck is loaded or unloaded
- ightarrow A maximum drawbar pull of 305 daN

Power steering

- → Proportional power-assisted steering, effortless to operate
- → Adjustable steering feedback (drive wheel) resulting in efficient stability
- → Automatic speed reduction when cornering
- → Manoeuvring effort vary depending on the turning angle
